

This map was created by riding the trails at least twice with a gps and then exporting the track info into some gps software and then exporting that as a bitmap. I then opened the bitmap in adobe illustrator and added a scanned usgs map in a lower layer. I then copied over tracks and significant features with the pen tool and saved it all as an acrobat file.

entrance fee required:
\$5 per car and
\$2 per bike for
three days.
Info current
2002.
